KEMARKS

The figures of births and deaths shown in this statement for week ending the 6th September, 1952, relate to 137 towns with an estimated population of 18,988 thousands. The total number of towns is 281 and their population is 34.764 thousands. Thus 49% of the total number of towns representing 55% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 12,943 and 6,674 representing birth and death rates of 35.4 and 18.3 per thousand of population respectively.

(A) States (Parts A & C).—The data here relate to 199 towns with an estimated population of 15,871 thousands. Information about Bihar and Madras and West Bengal could not be included. The total number of towns is 235 and their population is 29,570 thousands. Thus 46% of the total number of towns representing 55% of the total population is govered. The numbers of

births and deaths recorded in these towns were 11,307 and 5,786 representing birth and death rates of 37.0 and 19.0 per thousand of population respectively.

Hathras in Uttar Pradesh was the only town which had a high death rate of 54.7 per thousand of population and this high death rate was mainly due to deaths from fevers and respiratory diseases.

(B) States (Part B).—The data here relate to 28 towns with an estimated population of 3,117 thousands. The total number of towns is 46 and their population is 5,194 thousands. Thus 61% of the total number of towns representing 60% of the total population is covered. The numbers of births and deaths recorded in these towns were 1,636 and 888 representing birth and death rates of 27.3 and 14.8 per thousand of population respectively.

No town recorded a high death rate of 59 or over per thousand of population.
